Grand Canyon Education, Inc. Reports First Quarter 2024 Results

For the three months ended March 31, 2024:

- Service revenue for the three months ended March 31, 2024 was \$274.7 million, an increase of \$24.6 million, or 9.8%, as compared to service revenue of \$250.1 million for the three months ended March 31, 2023. The increase year over year in service revenue was primarily due to an increase in GCU enrollments to 116,952 at March 31, 2024, an increase of 7.7% over enrollments at March 31, 2023 and an increase in revenue per student year over year. The increase in revenue per student between years is primarily due to the service revenue impact of the increased room, board and other ancillary revenues at GCU in the first quarter of 2024 as compared to the prior year period. In addition, service revenue per student for Accelerated Bachelor of Science in Nursing students at off-campus classroom and laboratory sites generates a significantly higher revenue per student than we earn under our agreement with GCU, as these agreements generally provide us with a higher revenue share percentage, the partners have higher tuition rates than GCU and the majority of their students take more credits on average per semester. The increase in revenue per student in the three months ended March 31, 2024 was also positively impacted by the timing of the Spring semester for the ground traditional campus. The Spring semester started one day earlier in 2024 than in 2023, which had the effect of shifting \$2.1 million in service revenue from the second quarter of 2024 to the first quarter of 2024 in comparison to the prior year. The additional day for leap year in 2024 added additional service revenue of \$1.5 million as compared to the prior year.
- Partner enrollments totaled 120,788 at March 31, 2024 as compared to 112,588 at March 31, 2023. University partner enrollments at our off-campus classroom and laboratory sites were 4,486, an increase of 4.0% over enrollments at March 31, 2023, which includes 650 and 360 GCU students at March 31, 2024 and 2023, respectively. We opened five new off-campus classroom and laboratory sites in the year ended December 31, 2023 and two sites in the three months ended March 31, 2024, increasing the total number of these sites to 42 at March 31, 2024. Enrollments for GCU ground students were 22,965 at March 31, 2024 up from 22,568 at March 31, 2023. GCU online enrollments were 93,987 at March 31, 2024, up from 86,065 at March 31, 2023, an increase of 9.2% between years.
- Operating income for the three months ended March 31, 2024 was \$84.5 million, an increase of \$10.0 million as compared to \$74.5 million for the same period in 2023. The operating margin for the three months ended March 31, 2024 and 2023 was 30.8% and 29.8%, respectively. The first quarter operating margin was positively impacted on a year over year basis by the timing difference between years in the start of the Spring semester for GCU's ground traditional campus and an extra day in 2024 for leap year.
- Income tax expense for the three months ended March 31, 2024 was \$20.2 million, an increase of \$3.2 million, or 18.5%, as compared to income tax expense of \$17.0 million for the three months ended March 31, 2023. Our effective tax rate was 22.9% during the first quarter of 2024 compared to 22.3% during the first quarter of 2023. In the first quarter of 2024, the effective tax rate was favorably impacted by excess tax benefits of \$1.5 million as compared to \$0.9 million in the first quarter of 2023. The effective tax rate increased year over year due to higher taxable income and in the first quarter of 2023 the effective tax rate was favorably impacted by state income tax refunds.
- Net income increased 14.2% to \$68.0 million for the first quarter of 2024, compared to \$59.6 million for the same period in 2023. As adjusted net income was \$69.6 million and \$61.3 million for the first quarters of 2024 and 2023, respectively.
- Diluted net income per share was \$2.29 and \$1.94 for the first quarters of 2024 and 2023, respectively. As adjusted diluted net income per share was \$2.35 and \$2.00 for the first quarters of 2024 and 2023, respectively.
- Adjusted EBITDA increased 13.8% to \$98.6 million for the first quarter of 2024, compared to \$86.6 million for the same period in 2023.

Liquidity and Capital Resources

Our liquidity position, as measured by cash and cash equivalents and investments increased by \$46.2 million between December 31, 2023 and March 31, 2024, which was largely attributable to cash flows from operations for the three months ended March 31, 2024 exceeding share repurchases, changes in our investment balances and capital expenditures during the three months ended March 31, 2024. Our unrestricted cash and cash equivalents and investments were \$290.7 million and \$244.5 million at March 31, 2024 and December 31, 2023, respectively.

GRAND CANYON EDUCATION, INC.

Adjusted EBITDA (Non-GAAP Financial Measure)

Adjusted EBITDA is defined as net income plus interest expense, less interest income and other gain (loss) recognized on investments, plus income tax expense, and plus depreciation and amortization (EBITDA), as adjusted for (i) contributions to private Arizona school tuition organizations in lieu of the payment of state income taxes; (ii) share-based compensation, and (iii) unusual charges or gains, such as litigation and regulatory reserves, impairment charges and asset write-offs, and exit or lease termination costs. We present Adjusted EBITDA because we consider it to be an important supplemental measure of our operating performance. We also make certain compensation decisions based, in part, on our operating performance, as measured by Adjusted EBITDA. All of the adjustments made in our calculation of Adjusted EBITDA are adjustments to items that management does not consider to be reflective of our core operating performance. Management considers our core operating performance to be that which can be affected by our managers in any particular period through their management of the resources that affect our underlying revenue and profit generating operations during that period and does not consider the items for which we make adjustments (as listed above) to be reflective of our core performance.

We believe Adjusted EBITDA allows us to compare our current operating results with corresponding historical periods and with the operational performance of other companies in our industry because it does not give effect to potential differences caused by variations in capital structures (affecting relative interest expense, including the impact of write-offs of deferred financing costs when companies refinance their indebtedness), tax positions (such as the impact on periods or companies of changes in effective tax rates or net operating losses), the book amortization of intangibles (affecting relative amortization expense), and other items that we do not consider reflective of underlying operating performance. We also present Adjusted EBITDA because we believe it is frequently used by securities analysts, investors, and other interested parties as a measure of performance.

In evaluating Adjusted EBITDA, investors should be aware that in the future we may incur expenses similar to the adjustments described above. Our presentation of Adjusted EBITDA should not be construed as an inference that our future results will be unaffected by expenses that are unusual, non-routine, or non-recurring. Adjusted EBITDA has limitations as an analytical tool in that, among other things it does not reflect:

- cash expenditures for capital expenditures or contractual commitments;
- changes in, or cash requirements for, our working capital requirements;
- interest expense, or the cash required to replace assets that are being depreciated or amortized; and
- the impact on our reported results of earnings or charges resulting from the items for which we make adjustments to our EBITDA, as described above and set forth in the table below.

In addition, other companies, including other companies in our industry, may calculate these measures differently than we do, limiting the usefulness of Adjusted EBITDA as a comparative measure. Because of these limitations, Adjusted EBITDA should not be considered as a substitute for net income, operating income, or any other performance measure derived in accordance with and reported under GAAP, or as an alternative to cash flow from operating activities or as a measure of our liquidity. We compensate for these limitations by relying primarily on our GAAP results and only use Adjusted EBITDA as a supplemental performance measure.

The following table provides a reconciliation of net income to Adjusted EBITDA, which is a non-GAAP measure for the periods indicated:

	Three Months Ended March 31,	
	2024	2023

Non-GAAP Net Income and Non-GAAP Diluted Income Per Share

The Company believes the presentation of non-GAAP net income and non-GAAP diluted income per share information that excludes amortization of intangible assets and loss on disposal of fixed assets allows investors to develop a more meaningful understanding of the Company's performance over time. Accordingly, for the three-months ended March 31, 2024 and 2023, the table below provides reconciliations of these non-GAAP items to GAAP net income and GAAP diluted income per share, respectively:

	Three Months Ended March 31,
